7 WAYS TO BRUSH UP YOUR LINKEDIN PROFILE

How do you use LinkedIn? If you are like most people, you are a part of the social media network, but mostly ignore it, until the very moment you need it. Here you will find 7 quick and easy things you can do now (and maintain every few months) that will enable you to take advantage of all LinkedIn has to offer while you are a student!

1. Give your profile picture a check-up
Ask yourself if your picture is current enough, feels professional and will make a positive impression on those stopping by your profile. The best profile photo is of you alone in a somewhat professional outfit.

2. Make sure your headline is current and compelling
The right headline carries a lot of weight: it can give search engines valuable information and it can draw in readers. It is actually the first thing people see when they land on your profile. As a student, you might want to try writing what you specialize in or have a particular passion for, rather than just the title of your education.

3. Prioritize adding a summary
A personal summery of 40 words or more makes your profile more likely to turn up in searches. The summery should speak of your skills, motivation and interests. It will help people fully understand your skill set and reach out to your with relevant opportunities.

4. Highlight both your education, volunteer experience and jobs
Your online CV should represent all of you. Remember that you gain valuable skills from more than just the jobs where you where payed. List all the different roles and positions you have had and add a short description each place of what you learned or gained experience from.

5. Make use of multimedia
LinkedIn allows you to post videos, pictures and presentations of your work. As a student this is a platform for you to share the projects you engage in each semester. That give people a better understanding of what you work on and how you work! Also, profiles with media elements get subsequently more views.

6. Do not be stingy with connection requests
It is always better to add recent connections straight away. Whether you are working with someone new or meet someone interesting at an event (such as IT Match Making), be proactive and reach out to people you admire or want to get to know. Connections are helpful for many reasons and an important part of using the platform effectively. Building a professional network while you study will not only help you in job search, but could give you valuable inputs from professionals on your papers and projects.

7. Browse your network and reconnect with people
Take a few moments every few months to look at your network and send people quick messages saying hello, congrats on the new job or anything else. You need to keep relationships strong before you are asking for a favour. If someone is doing something you are truly interested in, take it a step further and suggest a quick catch up or coffee.
HOW TO NETWORK WITH CONFIDENCE AT IT MATCH MAKING!

Needless to say, networking can be an intimidating experience - especially when you are still a student or young in your career. However, it is important because it can lead to new connections and opportunities while you study. We encourage you to grasp the opportunity! Therefore we have gathered some tips for networking with confidence and reflective questions that will help you get off to a good start!

PERFECT YOUR STORY

All the people you meet will ask you about yourself and your skills, and rather than responding with a blank stare and a lot of hesitation, you are off to a good start if you have prepared a brief and powerful summary of your background, experiences, and accomplishments.

How will I present myself to new acquaintance / companies at this event?

____________________________________________________

____________________________________________________

____________________________________________________

Are there any particular projects, courses or extracurricular activities it may be relevant to add?

DETERMINE YOUR GOALS AHEAD OF TIME

Having a clear idea of what you hope to get out of the experience, will fill you with purpose and direction from the start. It will also ensure that you are making the most of the time you have.

What is the objective of my participation in IT Match Making?

What would I define as a success criterion?

HAVE YOUR QUESTIONS PREPARED

Events with industry are perfect arenas for expanding your network or gain fruitful advice from experts on everything from exam projects to job search. Asking curious questions will make most people set aside time for you, so take some time to ensure you are adequately prepared.

Could the industry provide insights or advice useful for any of my current study projects?

What expert advice could I get from the participants about job search?
You will most likely not have time to meet all companies, so take your time to review the list of participants and list the three most important companies you need to speak with before leaving the event – and note down why.
KNOWING YOUR COMPETENCIES

Brainstorm on your skills in terms of three categories:

- **Professional competencies**
  The skills you have acquired during your studies or relevant jobs

- **Personal competencies**
  The skills that relate to your person

- **General Competences**
  The skills you have acquired from extracurricular activities, spare time hobbies or the like

E.g. specific theories or methods, programming languages, academic skills

E.g. creative, ambitious, flexible, humorous, service minded, empathic, result orientated

E.g. language skills, specific IT programs, workshop facilitator, presenter
STARTUP FAIR

The event is held at the IT-University of Copenhagen October 4

Startup Fair: 15:30 - 17:30 in Atrium
Startup pitches: 17:30 - 18:00 in Aud1

Working for a startup provides more opportunities to contribute meaningfully and make an immediate, direct impact on the business. You’ll work in an awesome atmosphere with great people, have direct access to top management, and quickly learn a broad range of valuable skills.

Whether you’re looking for a part time or a full-time position, ITUs Startup Career Fair makes it easy to connect with the top tech startups in Copenhagen and the Oresund area.

Join the fair and meet the startups during the day and attend the pitching sessions where the startups will present their team, their culture and their open positions - so you can find the best match.

The event is hosted in by ITU Startup Programme & ITU Study and Career Guidance
